PRESS RELEASE

TCC Awarded Certification as a Minority Business Enterprise by the Mid-States Minority Supplier Development Council

In February 2019, the Mid-States Minority Supplier Development Council's (Mid-States MSDC) Board of Directors approved TCC as a certified minority business enterprise (MBE).

Certification will provide TCC with many business development benefits. The Mid-States MSDC offers businesses an excellent opportunity to meet one-on-one with corporate buyers who are interested in working with qualified MBEs. They offer many formal and informal opportunities to meet with corporate buyers, learn about state and local opportunities, improve your professional alliances and enhance your business. In short, the Mid-States MSDC offers access to more business opportunities with Fortune 500 and local and regional corporations.

We anticipate this certification will provide TCC with a competitive advantage as we market our products and services in the commercial sector with corporations who have supplier diversity programs.

About TCC

Founded in 1996, TCC is committed to designing and delivering high-value, cost-effective IT consulting services and application technology solutions for both the private and public sectors. With a team of more than 250 professionals, we serve clients nationwide and in US territories. Our innovative solutions deliver real-world results and have made us a leading services and solutions provider.
